

Alex Morgan

Software Engineer

alex.morgan@example.com | +44 7700 900123 | London, UK | github.com/alexmorgan-example | linkedin.com/in/alexmorgan-example

Summary

Software engineer with six years of experience building customer-facing web applications. Focused on React, TypeScript, accessible interfaces and frontend performance. Collaborates with designers and product managers to turn customer needs into reliable software.

Experience

Senior Software Engineer · Northstar Digital, London, UK

Jan 2022 – Present

- Led a React and TypeScript checkout redesign that reduced median page load time from 3.2 seconds to 1.8 seconds.
- Built 24 reusable UI components with Storybook and documented keyboard interactions for the product design system.
- Added 65 Playwright end-to-end tests to the release pipeline and reduced escaped frontend defects by 30%.

Software Engineer · Harbor Analytics, London, UK

Jul 2020 – Dec 2021

- Developed customer reporting dashboards in React, integrating REST APIs and presenting daily usage trends for 120 business accounts.
- Improved dashboard rendering performance by 35% through profiling, memoization and virtualized tables.
- Partnered with two designers and three backend engineers to deliver monthly releases, reviewing code and documenting production incidents.

Education

BSc Computer Science · University of Bristol, Bristol, UK

Sep 2017 – Jun 2020

First Class Honours. Final project: an accessible public transport journey planner.
